

Artificial ski slope and tubing

More than 25 years to serve mountain activities.

Ski resort partner since more than 25 years, IDM brings its knowledge for sliding mats and proposes tubing and artificial ski slopes,

In order to combine security with real fun times, IDM mobilizes the huge expertise of **SNOWTUBING FRANCE** company.

Winter tubing slope owner, SNOWTUBING applies its engineering to create a playful and secure track according to your needs and constraints.

Product

And knowledge

Mr. Snow sliding mat

Info

Initiated as a university project, MR.SNOW is an artificial sliding mat which has the most similarities with natural snow : **color, conservation of speed, and certainly, sliding sensations.**

Since 2017, IDM has chosen Mr. Snow sliding mat to propose the best technology to its customers.

MR. SNOW

German company
Worldwide patent
IDM exclusivity

SURFACE

Braided nylon in textile grid
Roll form 10m x 2m or 4m
White or green color

PERFORMANCE

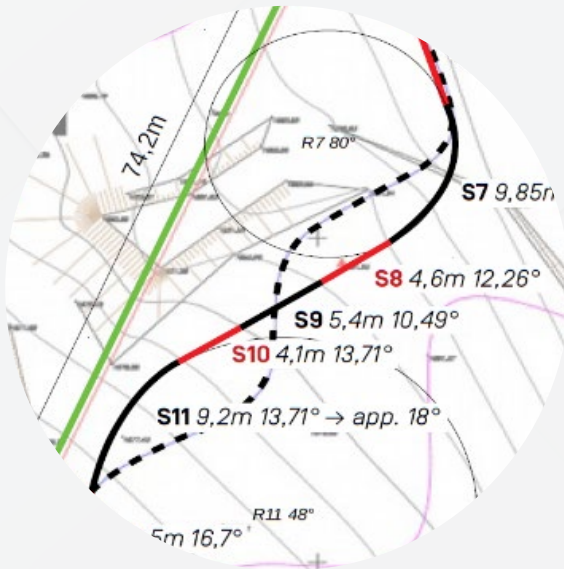

Slip coefficient
No lubrication
Fairly resistant to heat
Easy to install

Study : Installation and modelling

Info

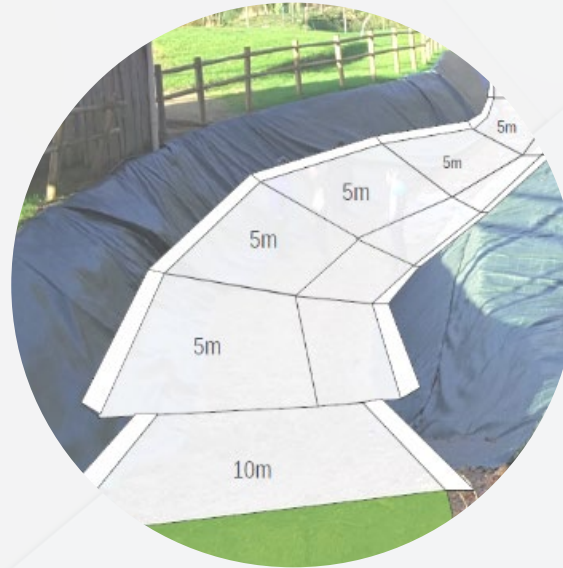

SNOWTUBING France relies on its operating and engineering know-how to offer you a custom installation.

With the help of its program, **SNOWTUBING France** models the speeds of the buoys according to the slope, the type of surface and the weight of the participants. This allows us to guarantee the best sensations on your slopes while ensuring optimal safety.

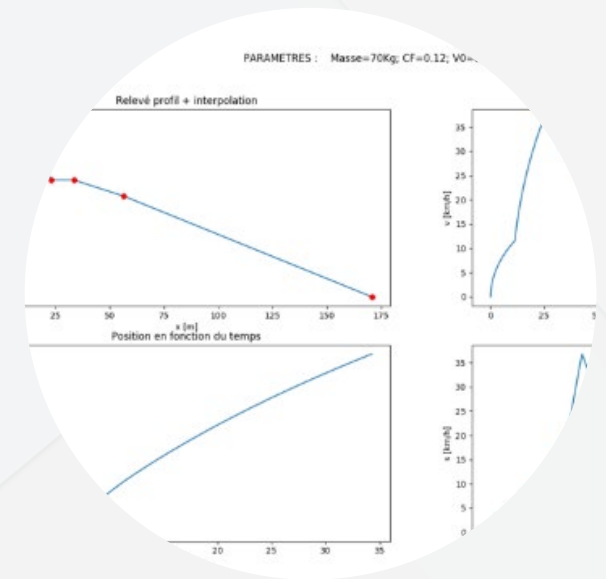

PLANS

Track layout based on the profiles of the terrain in question

IMPLANTATION

Visualization of your tracks in 3D according to the data collected

MODELISATION

Descent speed calculation, turning angles, ...

Modules

LAUNCH PLATFORM

Ideal for giving strong acceleration and initial speed to buoys.

BANKED TURNS

A module that allows to make individual tracks with bends for strong sensations.

AIRBAG AND TREMPLINS

To send your customers up in the air, there's nothing better than a Jump in a giant Airbag.

Accessories

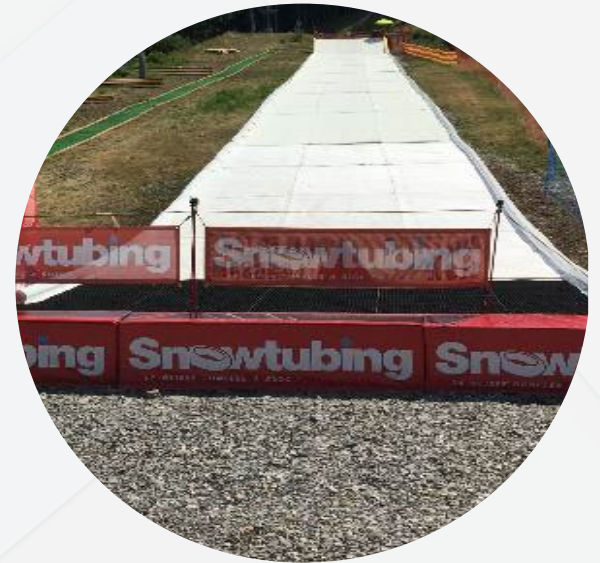

RUNWAY EDGES

In wood, PVC or metal, the edges of the runway make tubing safer.

BRAKING SURFACE

We use a braking surface, dedicated and completed with rubber rollers.

FOAM AND SIGNAGE

Various accessories: end of lane modules, arches, banners, bowling pins...

Buoys

L'info

We offer tubing buoys from the Canadian manufacturer Tube Pro. World leader since 1995, Tube Pro make in Canada buoys dedicated to tubing.

Today, more than 500 sites use the buoys, which are recognised as the most resistant and high-performance buoys on the market. The buoys can also be used for on snow.

COLORS

Several choices of bright colors

FLOCKING

Your logo or a sponsor's one

TAILLES

78 centimeters (child) and 103 centimeters (adult)

Kinds of Tubing Slope

straight and family track

From 4 to 6m wide, which allows a group of people.
Ideal for sharing a sliding moment with the family.

Launch Platform

Undercoat and Mr.Snow

Runway edges

Conveyor belt

Stop foam et accessories

Braking surface

Individual track

Straight or with bends, provides strong sensations of acceleration, of compression thanks to raised turns or whoops.

Braking surface

Turns with metal structure

Undercoat and Mr.Snow

Turns with wood structure

Runway edges

Launch Platform

Airbag jump

Jumping tracks with airbag are a bestseller for children and adults .
The adrenaline provided by the jump leaves no one indifferent.

Launch Platform

Runway edges

Conveyor belt

Ski Slope

The Mr.Snow surface offers you synthetic ski slopes with an incredible feeling close to skiing on snow.

Sous-couche et Mr.Snow

Some **benefits**

Benefits

The use of **existing ski lifts** (like conveyor belt)

A real **success story** in neighbouring countries, **including Italy**.

A **sustainable activity** in the face of **diversification issues**.

A **personalized and complete study** for a custom-made solution.

A **pro-active approach** to General Councils and Departments **to subsidise this type of diversification project**.
